Sympafix RT200 Rebar wire is a newly developed tie wire characterised by a high tensile strength combined with a high level of flexibility and improved elongation. This specific combination makes the wire work perfectly in the re-bar tier while providing a very strong knot ensuring the rebars are securely tied together.

Sympafix RT200 Rebar wire is galvanized to prevent rust deposition on the wire impeding the functionality of the re-bar tier.

Sympafix RT200 combined with Sympafix RT200 Rebar wire gives you the stronger re-bar tying solution!
